## SUMMARY

Frontend Developer with 3+ years of experience in building modern, responsive, and user-friendly web applications. Strong foundation in JavaScript, which I genuinely enjoy working with, and proficient in React, Next.js, Redux, Tailwind CSS, and Firebase for creating smooth and scalable interfaces. Comfortable working across the full stack when needed, with experience in Node.js, Express, and MongoDB. Passionate about clean code, intuitive user experience, and continuously learning new technologies to stay current with industry trends.

## Projects

### InvoNexus

Live | Frontend | Backend

- AI-based invoice management SaaS that converts vendor emails into searchable invoice records.
- Built intuitive dashboard with filtering, statistics, and smart search for real business users.
- Seamlessly integrated OpenAI for intelligent data extraction and structured record creation.
- **Tech:** React.js, Material UI, Node.js, Express.js, Firebase, Cloudinary, OpenAI API

### YTFCSS-ATS

Live | Code

- Modern applicant tracking system featuring AI-powered resume parsing and candidate scoring.
- Designed Kanban-style recruitment pipeline with search filters and synced real-time updates.
- Automated email communication via IMAP and OpenAI-enhanced decision support for hiring.
- **Tech:** React.js, Redux Toolkit, Firebase, IMAP, OpenAI API, Tailwind CSS

### Care Sync Flow

Live | Code

- Role-based hospital workflow management system for doctors, assistants, and admin staff.
- Enabled real-time patient monitoring, room status updates, and emergency alerts in dashboards.
- Built with performance in mind — supports fast-paced medical environments with ease.
- **Tech:** React.js, Firebase, Material-UI, SASS

## Education

Jahangirnagar University, Savar, Dhaka

Feb 2018 – Jun 2024

Bachelor of Science (BSc) in Statistics and Data Science

## Experience

Software Developer (Web), ProviderLINK – Remote, USA

July 2023 – Present

- Built and maintained modern web-based tools to support internal workflows for healthcare providers and staff.
- Developed real-time components using React and Firebase for seamless communication and document handling.
- Integrated OpenAI API for automating repetitive tasks and improving internal search and documentation workflows.
- Collaborated directly with cross-functional teams in a remote setup to design and ship features with quick iteration cycles.

Front-end Developer, Upwork – Freelance

Nov 2020 – Jun 2023

- Built and delivered responsive dashboards, admin panels, and interactive UIs using React, Firebase, and modern tooling.
- Integrated APIs, handled auth, and enabled real-time features via Firestore for global clients.
- Managed entire project cycles independently — from requirement gathering to deployment.

## Certifications

---

### Deep JavaScript Foundations

Jun 2024

YDKJS, *Kyle Simpson*, Frontend Masters

d6df507936-OnFYbrRoyf

### Modern Web Development

May 2024

*Full Stack open*, University of Helsinki (Online)

7791e4226d19f2d21e0879c0130cdad4

## Technologies

---

**Languages:** JavaScript (ES6+), TypeScript

**Frontend:** React.js, Next.js, Redux Toolkit, Zustand, CSS (Tailwind)

**Backend:** Node.js, Express.js, MongoDB, Firebase

**Others:** REST APIs, UNIX (macOS), Git, Vercel, Heroku
